

The Duchess Izabela Czartoryska Lower Secondary School No 93 in Warsaw is a school with which it is good to cooperate. We will share our knowledge, experience and organizational solutions with the students, parents, teachers and headteachers.

One of our priorities is teaching of foreign languages. Apart from English, taught in groups of different levels, our students choose one from the following ones: French, German, Italian, Russian and Spanish. We also participate in Comenius Assistantship Programme and we host foreign teachers who provide lessons in English as native speakers.

Our school is equipped with modern classrooms and IT rooms, a multimedia language room and a library. There are computers, projectors and interactive whiteboards in the classrooms. The sport part contains a gym, fitness room and a sports field. There is also a well-stocked shop as well as the canteen where the meals are prepared.

The students will be offered interesting and modern lessons and a great variety of extra classes such as: languages, theatre, sport, bridge, chess, dance. We will organize school trips, discos and concerts. We will also suggest participation in educational projects.

Our school is safe. It has monitoring, security and cooperates with the City Guards and the Police Department. The students can always count on help from the school pedagogues, psychologist, therapist and nurse.

We will show the teachers how we teach. We use modern techniques of teaching and we do our best to make learning interesting and attractive. We use e-learning and project work.

The headteachers will be presented with the organization of the process of didactics e.g. groups of different levels of languages, mathematics, physical education and art classes. Apart from these, they will be acquainted with the use and advantages of electronic register.

The Duchess Izabela Czartoryska Lower Secondary School No 93 is a modern school full of life and engagement of headteachers, teachers, parents and students.

We are open and willing to cooperate, realize international projects, and organize an exchange of students.
